Hi Rob,

There are some inconsistencies in the database between the locations previously provided by the CPG in the EDD files and those listed in Appendix A of the Final Design report. This does not appear to be a projection problem. Could you please check on the following:

- 1) Have any of the 2011 and 2012 coordinates been adjusted/corrected and, if so, can you provide an updated location EDD file?
- 2) Are locations titled 2012 RM10.9 A-0355 through 2012 RM10.9 A-0368 listed in Appendix A of the Final Design Report the same as 12E-0355 through 12E-0368 from the River Mile 10.9 Addendum A sampling event that occurred in May/June 2012?

Thanks,

Stephanie
